UNITED COMPONENTS EUROPE

# CONVEYOR TECHNOLOGY

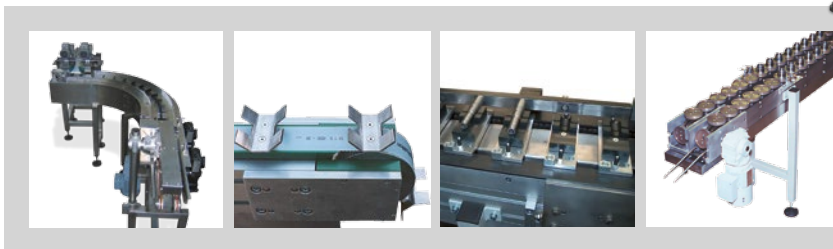

## BELT CONVEYOR

- Design as a profile or steel construction
- Stainless steel design for use in the food industry
- Wide range of drive and deflection units, materials and surface structures allows customized every conveyor on his specific tasks

## INDEXING CONVEYOR

- Individual production for customized applications
- Optionally with belt or chain drive
- Workpiece carriers are used by several production parts

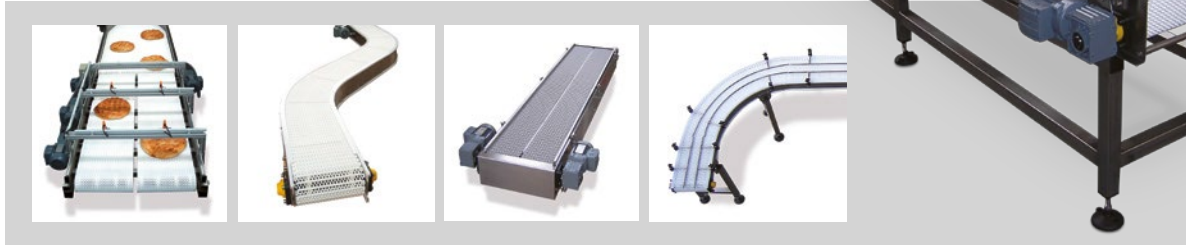

## HOPPER CONVEYOR

- Used for regulated transport of small-parts or bulk material
- Transported material is conveyed to required discharge height into bowls and feeding devices
- Hopper conveyors will be adapted for the material characteristic of goods for very varied fields of application in industry
- Hinge plates, plastic chain mats or conveyor belts with entraining elements (cleats) are available for selection
- Stainless steel or painted steel available
- Accessory: discharge chutes, covers, mobile configuration, internal coating of conveyor and level controller

## PLASTIC MATS CONVEYOR

- Used for straight, inclined or any curves line
- Upper belts available in open and closed version
- Carriages and anti-slip profiles make inclined transport easier
- Simple and stable lock systems allows a quick installation

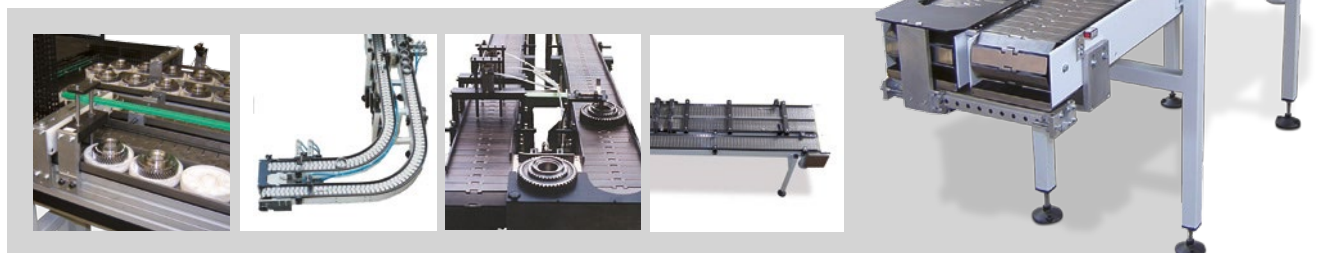

## HINGED PLATE CONVEYOR

- Used for heavy, hot or sharp-edged mass produced parts
- E. g. transport of stampings or forgings, as well as disposal of chip or stamping scrap
- Available in steel or stainless steel design

## HINGED CHAIN CONVEYOR

- Used for turned or gear components, as well as for a safe transport of glasses and bottles in the beverage industry
- Versions: support frame in steel, stainless steel or tubular design, chain is made of plastic, steel or hardened and tempered steel

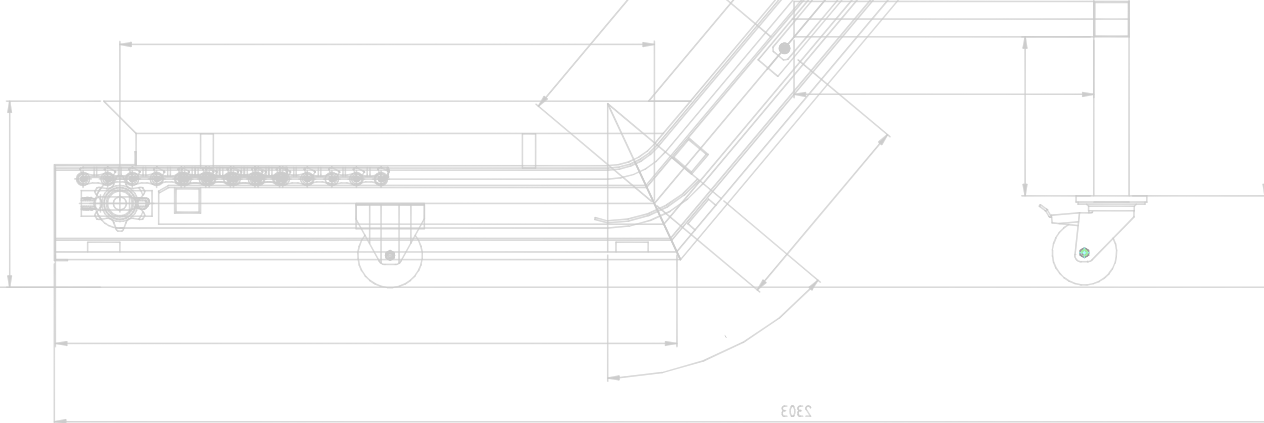

## PLANNING OF YOUR CONVEYOR SYSTEMS

We plan, develop and distribute customized conveyor systems that meet specific needs and requirements from:

- Automotive industry and their suppliers
- Electrical and electronics industry
- Metal industry
- Plastics industry
- Pharmaceutical industry
- Beverage industry
- Food industry
- Chemical industry
- Cosmetics industry
- Glass industry
- Paper industry

Our extensive product range offers conveyor technology in practically all dimensions and with all features. All offered systems will be delivered at customer's option in profile-, steel construction or complete design in stainless steel.

**Please contact us already by planning and benefit from our many years of experience and technical know-how. We are looking forward to realize successful projects!**
